  Sr. Secondary School (12th Board)

PROJECTS

Airbnb Clone (Wonderlust) - (MERN Based)
- Built a mini Airbnb clone with property listings, user authentication, review system, and commit section.
- Create dynamic pages using EJS templating and user session with Express.JS
- Implemented secure routing, session management, and CRUD operations.

Food Delivery Website (Tomato) - (MERN Based)
- Developed a fullstack food delivery web app using MongoDb, Express.js, React.js and Node.js.
- Implemented features like user authentication, menu browsing, cart system, and order placement.
- Utilized RESTful APIs for seamless communication between frontend and backend.

Laravel Blog - (PHP - Laravel Based)
- Create a full featured blog with Laravel, including multi-user roles, image uploads, category-based filtering, and CKEditor integration.
- Used Eloquent ORM, routing model binding, and Laravel Auth forr secure access.
- Designed responsive UI using Blade templating and Bootstrap framework
- Followed MVC architecture with clean code structure and production-ready configuration
